support live streaming, EyeCard and EyeCard Plus. The Mercury 360 RRS offers random rotor speed to protect operators against advantage and section bet players, particularly helping operators in the online sector. This is a discreet and beautifully executed security feature seamlessly built in to a traditional product. Serving this important niche sector demonstrates our commitment to our specialist field and the high importance we place on all of our customers operational requirements.

Investment in technology and product development is critical to any organisation involved in this highly competitive market. What is Cammegg's policy on investment in innovation and product development?

Innovation has always been central to Cammegg's philosophy, with firms including: maintenance free for life bearings, invisible in rim sensors, one piece rotor, open protocol for third party communication, scalloped separator rings and a reinforced Garnitte rings and track to name but a few. Innovations such as these have not only given Cammegg roulette wheels a well established reputation as the market leader, Cammegg's state-of-the-art Billboard Display System shares a similar reputation, operating as a multi-faceted and functional product on a common hardware platform, giving our customers greater flexibility.

We have always invested in R&D, supporting the constant stream of ideas we collect from our customers, but also that naturally occur as part of our day to day business and from the passion we have in what we do. Prioritising the investment into the multitude of ideas is just as challenging as developing them into marketable products, but we will always focus on our core products and this keeps our R&D priorities in check.

How were sales of the popular Cammegg Billboard Display Systems in 2014 and can you provide details on the various additions and upgrades to the system?
Our Billboard Displays are incredibly popular with sales increasing year on year. The biggest market for our screens is Australasia with the Billboard Displays

featuring in some of the largest casinos in the region such as Crown Casino Melbourne and Sky City. That said, the demand for our displays remains phenomenal in other parts of the world with the US, Europe and African markets all representing a significant number of Billboard Display System sales. We have also experienced increasing growth in the Asian market, perhaps most notably with a prestigious order for customised roulette wheels and Billboard Displays for Galaxy Macau.

Cammegg Billboard Displays work with a multitude of casino games including: Roulette, Baccarat, Blackjack, Casino Wars and Sic Bo. Since the first release in 2004, Cammegg's Billboard Displays have continued to push the boundaries in casino display technology, recent upgrades to the system include: scheduled TV streaming, meaning that the screens can now be used as a point of sale and advertising for the casino anywhere on the game floor and Multiboard mini; the ability to show results from multiple tables on one screen.

Also included are features such as bespoke graphic designs, pin sharp 3d graphics & animations, 3rd party integration and data logging & live export.

And finally for those of our readership planning to attend next month's G2E Asia Show, please can you provide them details on your booth at this year's exhibition?

Cammegg are looking forward to what will be our 30th G2E Asia show. The show will see the brand new Cammegg roulette side bet, Spread Bet Roulette, make its first appearance in the region having had its debut at ICE in February. Cammegg's EyeCard and EyeCard Plus will be at the booth, partnered by Billboard Display Systems showcasing the very finest Baccarat graphics.

The cornerstone of Cammegg's exhibit will be the flagship roulette wheel, the Mercury 360 together with the visually stunning Crystal wheel, Mercury 360 Aurora and the patented Singshot 2 automatic roulette wheel. Visitors can find us at booth number 865, we hope to see you there!
